**Project:** Global Collaboration Ticket Management System  
**Outline:** This is a ticket management system with an added feature for translation of ticket information from one language to another, especially suitable for companies having offices spread across the globe.  
**Technology:** PHP, Ajax, JavaScript, jQuery

**Benefits realized:**
- Companies with presence in multiple locations with different language capabilities felt the ease of use.
- The system also was utilized as a groupware across various teams within the organization.
- Resulted in reduction of overheads in communication, translation and overall issue management.

**Project:** CaseM  
**Outline:** CaseM is a complete solution for Law firms to assist Attorneys, Lawyers, Consultants, Individuals and other Law professionals to manage their legal cases which includes Cases, Tasks, Contacts, Calendar, Documents, Reports and more. Targeted at audience from various regions, CaseM is developed in five different languages.  
**Technology:** Java, Play Framework, Heroku Server, Scala, PostgreSQL, iOS 7.1, Xcode 6.0.1, D3.js

**Benefits realized:**
- Saves requisite documents for each legal case, thus eliminating cumbersome paperwork.
- Updated details under sections Cases and Tasks facilitate effective management of cases.
- Users can Save, Edit and Manage multiple tasks for different geographical locations.
**Case Studies**

**Project:** SmartMobiERP  
**Outline:** This is a Field application software that can be used to perform parts management after completion of each process in the manufacturing cycle and also to manage the progress of each process.  
**Technology:** C#, WinRT, MS SQL Server 2008 R2/WCF  
**Benefits realized:**  
- Resulted in betterment of project management life cycle  
- Instant report generation led to better customer satisfaction  
- Saved cost and time by enabling enterprise mobility

**Project:** School Bus Management Package  
**Outline:** This is a web and mobile application that enables parents to track school bus movement. Our work included Multi lingual support, Time zone support, Globalization of the application, SMS notification, Replacement of underlying map information service provider to Google Maps, Changing existing web application to mobile application meant for the guardian, RFID card reader support, School entry and exit confirmation functionality.  
**Technology:** PHP/Fuelphp, Google Map API, Android Java, iPhone Object-C
**Project:** SwimIndia

**Outline:** SwimIndia is the only framework built on SMAC that provides a complete solution for Swimmers, Coaches, etc. with a vision to help Swimmers Interact - Inspire - Achieve. SwimIndia is an integrated solution jointly developed by Utpaara and Nichi-In that includes a Website portal (http://swimindia.in), Web Application and a Mobile Application that runs on iOS and Android devices.

Interact - The only Social Networking Platform and Mobile App for Swimmers, Coaches, Parents, Swim Clubs and Enthusiasts - Make friends, Post Messages, Photos, Videos and Comments

Inspire - The only portal for complete Swimming related information - Nutrition & Diet, Training & Exercises, Results & Records, Meets & Events, Videos & Blogs, Gear & Accessories, Tips from the Experts, Manage Training, Diet and Injuries

Achieve - The only App to help Swimmers Track their Performance, Analyse and Compare the Progress and help Achieve the set Goals and Targets

SwimIndia is an integrated solution that includes a Website portal (http://swimindia.in) with User Registrations, Web Application and a Mobile Application that runs on iOS and Android devices.

**Technologies:**
Android, iOS, PHP, Backbone.js, JQuery, Node.js, WordPress, MySQL, AWS
ODC Case Study

**Project:** E-Discovery International Litigation Support System

**Outline:** This is a comprehensive international-litigation support system based on advanced computer forensics technologies like artificial intelligence and behavior informatics that fulfills all requirements across the EDRM (The Electronic Discovery Reference Model) workflow.

It is basically designed to reduce data volumes, streamline processes and make multi-lingual reviews more efficient and cost effective in international litigation processes. It is the one of the most accurate, advanced legal process support system available for multi-language data sets and is capable of handling complexities involved in processing Chinese, Japanese and Korean languages and provide effective technology assisted review (TAR) tools for searching across multiple languages simultaneously. Lot of customized solutions are being built around this based on Predictive analytics.

**Nature of work:** Product Development/Maintenance/Support

**Nature of Engagement:** Long Term ODC

**Current Team Size:** 12 Members (including the PM)
ODC Case Study Contd....

Technology Involved: C#.NET, WCF, WPF(Silverlight), Pure MVC Framework, PostgreSQL, Citrix XenApp based Remote Login

Other Tools: Redmine, Tortoise Subversion(SVN)

Evolution: The engagement started with a 2 people trial project for 1-2 months. The Client was impressed with our delivery commitment, quality and flexibility, which resulted in an increase in the team size to 5 people immediately and to 12 people in the next 3-4 months. This ODC is active for the last 3 years now with a clear visibility for at least next 2 years. We are expecting the team size to increase to 16-17 this year as the Client has acquired new end users for their product.

Benefits Realized: Client had to encounter communication overheads in the initial period of 3-6 months. But productivity increased after that period resulting in a significant cost reduction by 40%.
Nichi-In has been a valuable partner for us in building solutions using web and cloud technologies.
- A critical IT solutions provider, based in Silicon Valley.

We consider Nichi-In Software as one of our strong partners due to their Japanese language expertise and experience of their team in delivering quality solutions.
- Mitsubishi Electric India Pvt. Ltd.
Nichi-In is supporting us in offshore software development, onsite software development support and is a very important vendor for us.
- Gazoo Media Service India Pvt. Ltd. (A Toyota group company)

We evaluated Nichi-In in terms of design ability, schedule management, issue management. We found Nichi-In very professional in all these and we are happy to work with Nichi-In as one of the preferred outsourcing partners. - NRI, Nomura Research Institute
One of the “Top 20 PROMISING IT services companies of Asia” in CIOReview magazine (online and print) published on February 21, 2014.
